PARTNERSHIP DECK

October 15, 2024  
London, United Kingdom

# BRINGING AFRICAN ENERGY CLOSER TO THE WORLD

Focused on showcasing Africa's role in the global energy mix, **Africa Energy Investment Outlook** brings together top financers, investors, consultants and players across Africa and European energy markets. The event will address the dynamic landscape of the Africa Energy industry, focusing on four key themes:

- Energy Transition
- Electricity Infrastructure
- African Gas
- Renewable Energy

Africa Energy Investment Outlook will present an unrivaled opportunity to engage key stakeholders in the African energy industry, and equally explore investment opportunities in the market. From an experienced energy executive, to investors, to government representatives, to advisors and consultants, the event offers a dynamic platform to learn, collaborate, network and do deals.

## EVENT BY NUMBERS

**200+**

delegates

**20+**

speakers

**60+**

companies

**30+**

decision  
makers

- ✓ Promote the interests of African energy, high-light projects and stimulate new investment in Energy from European entities.
- ✓ Facilitate European companies in understanding and investing in African energy opportunities.
- ✓ Enhance discussions across financing of renewable energy projects and electricity infrastructure in Africa
- ✓ Create new linkages and relationships and host the discussions that drive long-term policy formation.
- ✓ Discuss and establish the future role of gas as a transition fuel, and out-line sustainable investment and development strategies.

# HIGHLIGHTS FROM OUR LONDON EVENT

## WHO WILL ATTEND?

Africa Energy Investment Outlook will bring together **200+** senior energy executives, government representatives, financiers, consultants, advisors, investors and everyone with interests in African energy.

## WHAT CAN ATTENDEES EXPECT?

Attendees at the Africa Energy Investment Outlook will;

1. Engage directly with investors, market leaders, senior decision makers across the African energy market
2. Gain invaluable insights into the future investment in African Energy.
3. Explore perspectives, insights, expertise and experience with other investors and market leaders.
4. Network with industry stakeholders with interest in African Energy.

## | AGENDA & KEY DISCUSSIONS

**STATE OF THE MARKET** - Industry report for Africa's Energy.

---

### **AFRICA ENERGY TRANSITION: FINANCING AFRICA'S ENERGY FUTURE**

Africa's drive to building a successful energy future is limited by its constant challenge access to capital. In this day and age, accessing financing requires unrivaled ingenuity and competitiveness while aligning local interests with global scrutiny.

This opening key session, will offer insights from some of Africa's most influential thought leaders shaping the future of investments and energy. This session will equally examine Africa's path to energy transition, industry leaders will share best practices and insights on what a successful energy transition will mean for Africa.

## ELECTRICITY INFRASTRUCTURE AND AFRICA; INSIGHTS FROM PPP'S

To reach universal access in Africa, \$50 billion is needed annually in grid infrastructure alone by 2030. Unlocking this scale of financing will mean that investment in grid expansion must shift beyond dependence on public capital and attract private financing.

Public-private partnerships (PPPs) are increasingly being recognised by government and industry players as a gateway to private investment for grid expansion. This session will bring together stakeholders working across various verticals of Electricity infrastructure financing, to share insights and best practices, especially for IPP's and PPP's

- What institutional investors require to come in on major energy infrastructure investments.
- How isolated grids can be planned to complement Africa's transmission network.
- The role of PPPs to increase private sector participation in transmission / large-scale energy infrastructure.
- With thousands of kilometres of new energy transmission being built, what is going to be the impact for IPPs and utilities?

## AFRICAN GAS IN THE GLOBAL ENERGY MIX

As important as gas is for Africa, its use as a transition fuel is yet to be truly actualised. According to the IEA, tapping into Africa's undeveloped gas reserves could add an additional 90 bcm per year by 2030, around two-thirds for domestic needs, and the rest for export. Given that potential, how can African nations build paths for domestic gas monetization whilst balancing export needs?

- Domestic, regional, and international supply - which scenario is best for Africa and what is required to build roadmaps for a balanced gas monetisation strategy?
- What are the challenges of developing gas-to-power and what is required to fast track it's potential in the short to medium term?
- How can Africa monetize its gas locally to eradicate energy poverty, industrialise, and advance towards middle income economies?
- Balancing gas monetizing with LNG. What policy is required to make domestic monetization a reality?
- How can Africa fast track investment into domestic and regional gas development to provide energy security across the continent?

## FINANCING RENEWABLE ENERGY PROJECTS IN AFRICA

Achieving universal energy access requires a step change in energy project financing. By 2030, investment in energy access in Africa needs to reach nearly USD 25 billion per year to ensure modern energy for all — a small share of overall energy investment but a dramatic increase compared with today's spending. Today, more than 40% of the population in Africa live without access to electricity, and 70% without access to clean cooking fuels.

This session will bring together developers, financiers and other stakeholders across Africa's renewable energy industry, providing them with a platform to explore and discuss bottlenecks in financing renewable energy projects in Africa.

- How can we make capital more affordable to unlock development across Africa's renewable energy market?
- What financing instruments should players prioritize to scale Africa's renewable energy future?
- What right regulatory measure should African government stakeholders pay attention to? How do we equally mitigate risks?
- What role will domestic financial players play in ensuring long-term investment in Africa's renewable energy?

An event by:

Eventhive is **Africa's leading B2B2C** event servicing company with event portfolios across **Lagos, London, Nairobi, Kigali and New York**.

Eventhive.ng operates in the heart of the knowledge and information economy across major sectors in Africa. We enable businesses to grow through connecting them with knowledge, ideas and opportunities.

### **Industries we operate in;**

**Energy . Tech . Real Estate . Finance . Transport**
